Organisation description

The Electrification Financing Initiative (ElectriFI) is a blending facility funded by the European Union and managed by the EDFI Management Company. ElectriFI aims to unlock, accelerate and leverage private sector investment to increase or improve access to affordable, reliable, sustainable and modern energy in developing countries.

Offer / opportunities

- Instruments offered: Debt and equity investments (blending facility funded by the European Union, managed by EDFI Management Company). ElectriFI does not provide grants or concessional financing.
- Investment range: Average ticket size of EUR 2–5 million per transaction.
- Risk appetite / stage focus: Early-stage companies and projects seeking to increase or improve access to affordable, reliable, sustainable and modern energy
- Co-investment requirement: ElectriFI seeks to catalyse other investors and requires co-investors to cover at least 50% of any given transaction
- Geographic scope: Investments limited to Benin, Côte d'Ivoire, Zambia, Nigeria, Kenya, Uganda, Eswatini, Mozambique, DRC, Togo, and Lesotho.

Primarily looking to engage in:

- Productive use of RE projects
- C&I electrification projects
- Mini-grid / DRE projects
- EPCs / project developers
